

# What You Should Know about the COVID-19 Vaccines

COVID-19 vaccines are very important tools to help end the pandemic. The vaccines can keep you from getting sick and allow your body to build up defenses to fight off the virus.

## How do I get the COVID-19 vaccine?

Visit [www.wellcareca.com](http://www.wellcareca.com) for information.

 **To book** your vaccine appointment: Sign up at [myturn.ca.gov](http://myturn.ca.gov).

### For more help:

 **Call** the California COVID-19 Hotline at **1-833-422-4255** for help (Monday through Friday: 8 a.m. to 8 p.m., Saturday through Sunday: 8 a.m. to 5 p.m.)

 **Contact** your doctor or pharmacist for guidance

 **Check** with your county public health department

 You may be able to access transportation. Check with your health plan, or call Access2Care at **1-844-829-6247** for transportation services.

## Can I get COVID-19 from the vaccine?

No. The COVID-19 vaccines do not contain the coronavirus or any part of the virus. You cannot get COVID-19 from the vaccines. It will not cause you to test positive for COVID-19.<sup>1,2</sup>

The **COVID-19 vaccines** are at **no cost to you.**

*(continued on back)*

## How were the COVID-19 vaccines made so fast, and why was the government involved?

The COVID-19 vaccines were made using the same standards as for other approved medications and vaccines.<sup>1,2</sup> Because COVID-19 has spread so fast, the government gave extra money to speed up the process to help produce and distribute the vaccines across the country.

## Are the COVID-19 vaccines safe?

Safety is a top priority during all vaccine clinical trials. This is also true for the COVID-19 vaccines, which are approved for emergency-use by the FDA. To see how the vaccines offer protection, experts made sure to recruit adults from many different backgrounds, races, ethnicities, and geographic areas.<sup>3</sup> People with different health conditions were also part of the trials.<sup>3</sup>

## Are all available COVID-19 vaccines effective?

All COVID-19 vaccines approved by the FDA for emergency-use are highly effective. They significantly prevent hospitalization and death due to COVID-19.<sup>1,2</sup>

## Should I get the vaccine if I have allergies or other medical conditions?

If you have any concerns about getting the COVID-19 vaccine, check with your doctor first. Your doctor can explain more and help you make a vaccination plan.<sup>1,2</sup>

## What are the side effects?

**Side effects from the COVID-19 vaccines are normal and usually mild.** They may happen after you get the vaccine and go away within a day or two.<sup>1,2</sup>

**Common side effects can include:**<sup>1,2</sup>

- |   |  |
|---|--|
| <input checked="" type="checkbox"/> Pain, redness, or swelling where you got the shot | <input checked="" type="checkbox"/> Chills   |
| <input checked="" type="checkbox"/> Fatigue   | <input checked="" type="checkbox"/> Fever    |
| <input checked="" type="checkbox"/> Muscle and/or joint pain                          | <input checked="" type="checkbox"/> Headache |
|   | <input checked="" type="checkbox"/> Nausea   |
